

How to Invite a Portal User and Connect Shopify to 7D

This guide covers the full client onboarding flow: invite a portal user, confirm the invitation email, install the Shopify app on the client's store, and connect Shopify in the **7D Client Portal**.

Step 1 — Invite the portal user

Before a client can connect Shopify, a **portal user** must be invited for their account.

1. Sign in to the **7D admin dashboard**.
2. Go to **Management** → **Clients** → **Portal Users**.
3. Click **+ Add User**.
4. Select the **Send Invite** tab.
5. Enter the user's **email**, **full name**, and other contact details.
6. Under **Assign to Client**, choose the correct client (for example **Hapa**).
7. Under **Role**, choose **Owner - Full access and billing** (or the appropriate role for that user).
8. Click **Save & Send Invitation**.

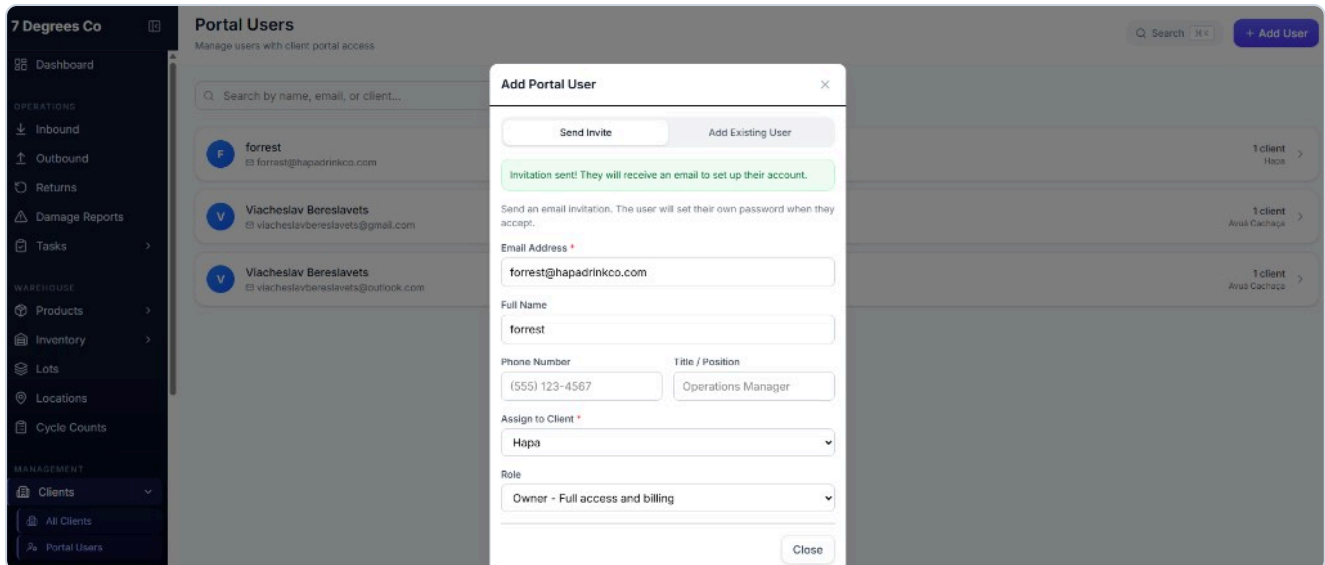

The screenshot shows the '7 Degrees Co' admin dashboard. On the left is a sidebar with navigation links: Dashboard, Inbound, Outbound, Returns, Damage Reports, Tasks, Products, Inventory, Lots, Locations, Cycle Counts, Clients, and Portal Users (which is highlighted with a red circle). The main area is titled 'Portal Users' and contains a table of existing users. A modal window titled 'Add Portal User' is open in the center. This modal has two tabs: 'Send Invite' (highlighted with a red circle) and 'Add Existing User'. The 'Send Invite' tab contains a form with the following fields: 'Email Address' (with the value 'forrest@hapadrinkco.com'), 'Full Name' (with the value 'forrest'), 'Phone Number' (with the value '(555) 123-4567'), and 'Title / Position' (with the value 'Operations Manager'). Below these fields are two dropdown menus: 'Assign to Client' (with 'Hapa' selected and highlighted with a red circle) and 'Role' (with 'Owner - Full access and billing' selected and highlighted with a red circle). At the bottom of the modal are three buttons: 'Cancel', 'Save', and 'Save & Send Invitation' (highlighted with a red circle). In the top right corner of the dashboard, there is a '+ Add User' button, also highlighted with a red circle.

Invite a portal user — fill in details and send invitation

Step 2 — Confirm the invitation email was sent

After sending the invite, the form should show a success message:

Invitation sent! They will receive an email to set up their account.

Invitation sent — email confirmation message

Ask the client to check their inbox (and spam/junk folder) for the invitation email. They will use that link to create a password and sign in to the **Client Portal**.

If the email does not arrive, confirm the address is correct and resend the invitation from **Portal Users**.

Step 3 — Install the Shopify app on the client's store

The client must install the **7D Shopify app** on their Shopify store before connecting in the portal. Use the install link provided by 7 Degrees Co, or the public Shopify app listing when it is available.

Example: Hapa

Shopify store name: rpujsi-ji (the part before .myshopify.com)

Install link for Hapa:

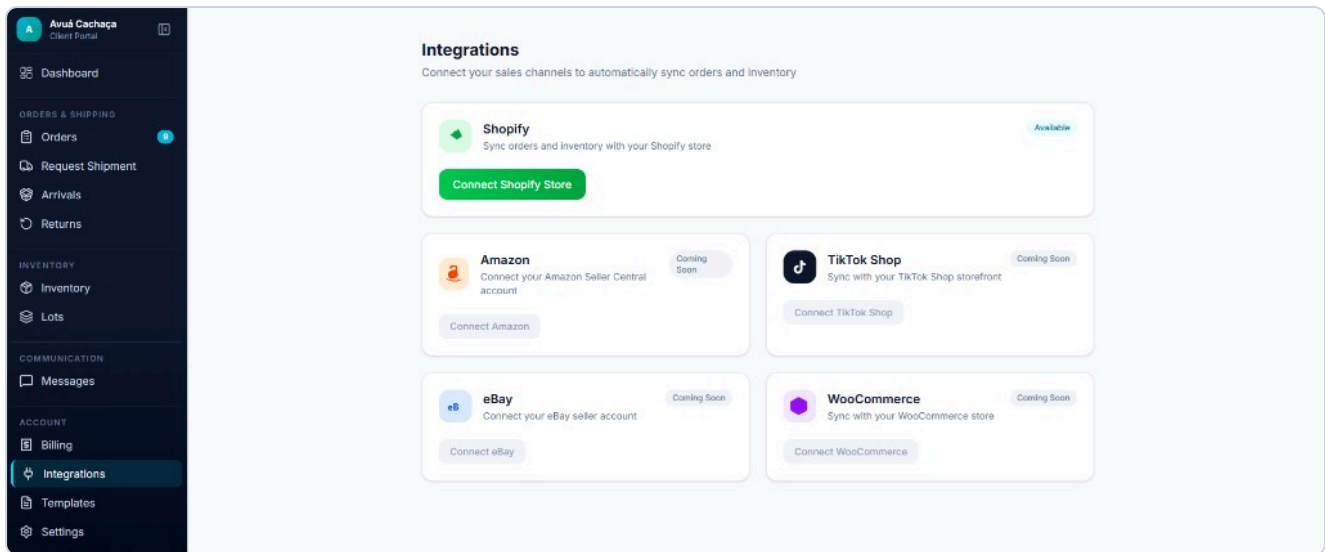

```
https://admin.shopify.com/?redirect=%2Foauth%2Finstall_custom_app%3Fclient_id%3D52eed85544fe093de458828137f3e381%26no_redirect%3Dtrue%26signature%3DeyJleHBpcmVzX2F0IjoxNzg5MDg4ODk0LCJwZXJtYW51bnRfZG9tYWluIjoicnB1anNpLWppLm15c2hvcGlmeS5jb20iLCJjbGllbnRfaWQia0I1MmVlZDg1NTQ0ZmUwOTNkZTQ1ODgyODEzN2YzZTM4MSIsInB1cnBvc2UiOiJjdXN0b21fYXBwIiwibWVhbnRfb3JnYW5pemF0aW9uX2lkIjoxNjkwNjA5MDd9--7a452f9ec237d3f22cab53cdcb72542bb0f8a240&no_redirect=true
```

Steps for the client:

1. Open the install link above (or the link 7 Degrees provides for their store).
 2. Sign in to their Shopify admin if prompted.
 3. Review the app permissions and click **Install** or **Approve**.
 4. Confirm the app appears as installed on their Shopify store.
-

Step 4 — Open Integrations in the Client Portal

1. The client signs in to the **7D Client Portal** using the invitation email.
2. In the left menu, under **Account**, click **Integrations**.

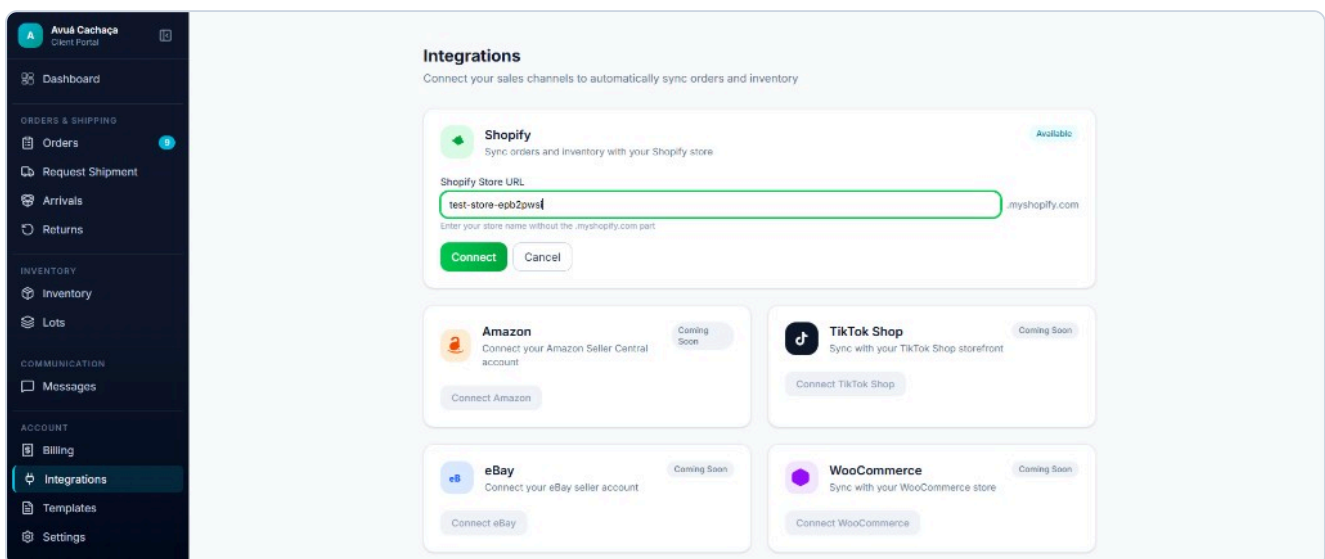

Integrations page — Connect Shopify Store

3. On the **Shopify** card, click the green **Connect Shopify Store** button.

Step 5 — Enter your Shopify store name

1. In **Shopify Store URL**, type only the store name (the part before `.myshopify.com`).
Example for Hapa: enter `rpujsi-ji`.
2. Click **Connect**.

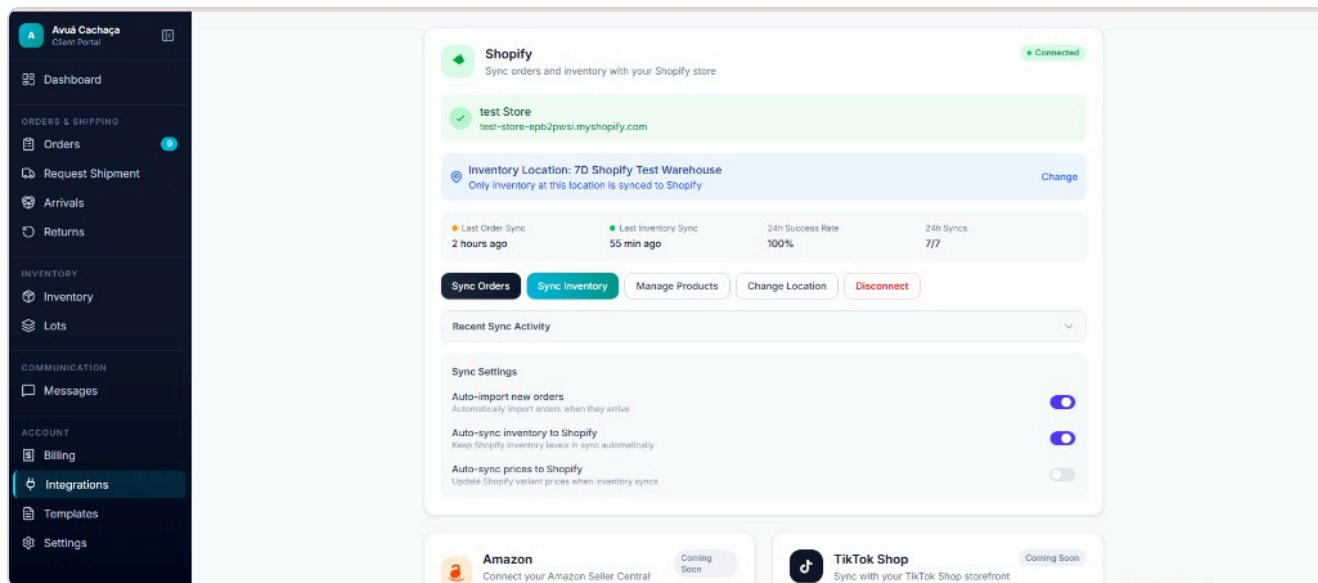

Enter store name and click Connect

3. Shopify opens and asks you to approve the 7D app for your store. Review the permissions and click **Install** or **Approve**.

4. You are returned to the portal. You should see a success message and the Shopify card shows **Connected**.

Step 6 — Confirm the connection

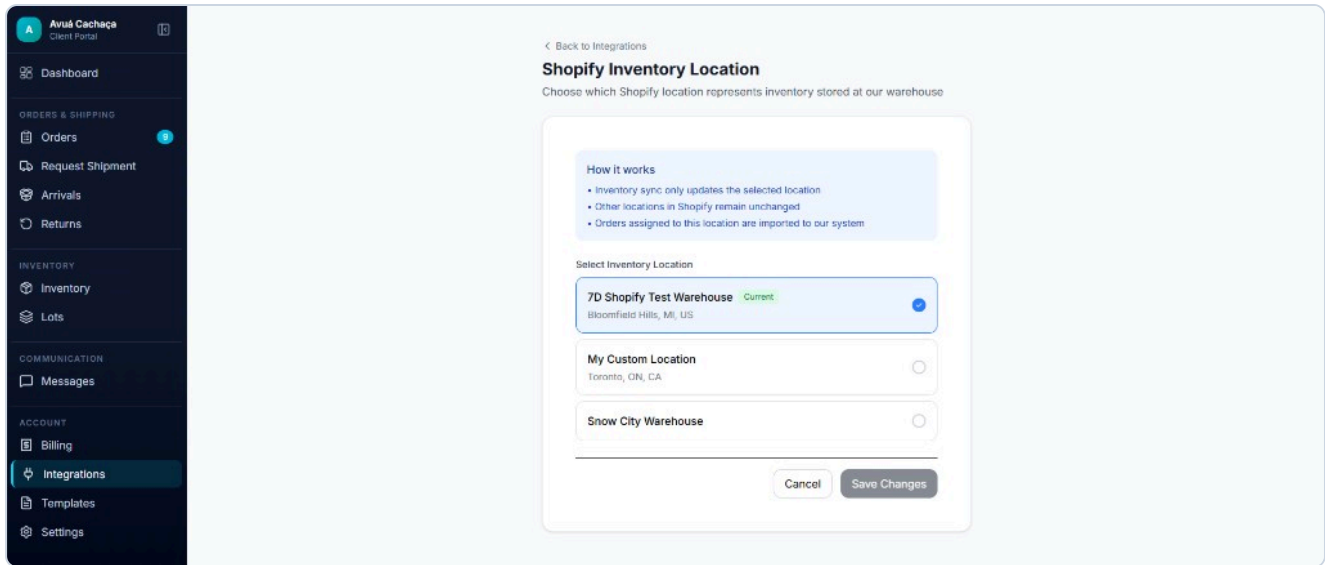

After connecting, the Shopify card shows your store name and domain, and buttons to manage the link.

Shopify connected

Step 7 — Choose the Shopify inventory location

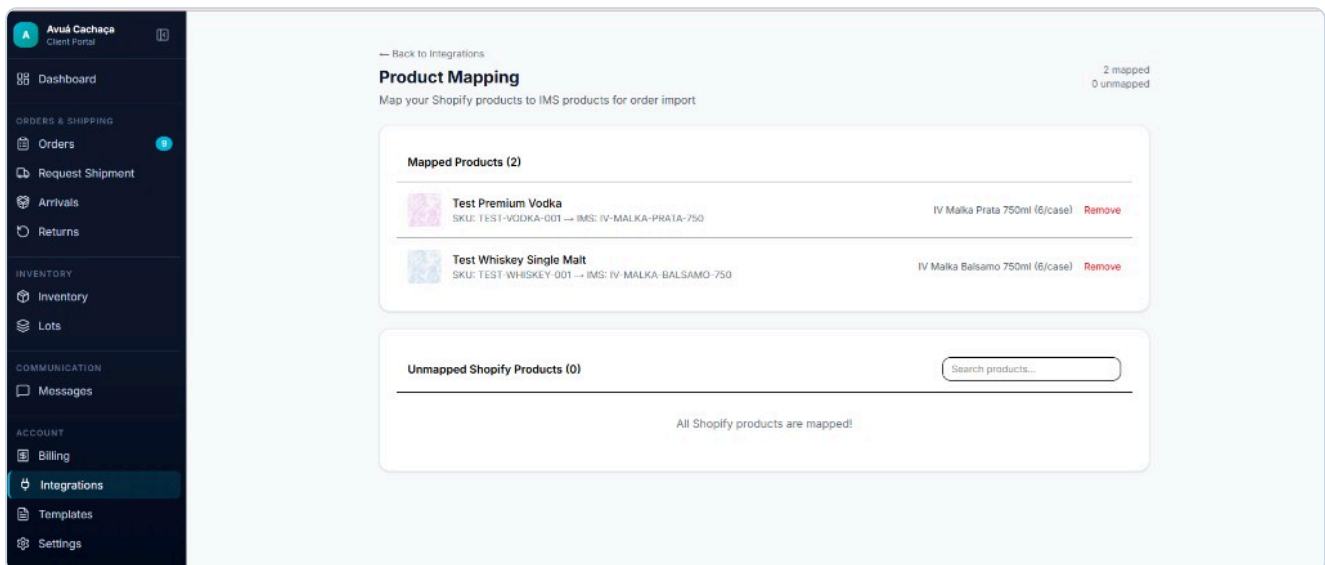

1. Click **Change Location** (or **Change** next to the inventory location).
2. Select the Shopify location that represents stock held at the 7D warehouse (for example **7D Shopify Test Warehouse**).
3. Click **Save Changes**.

Select Shopify inventory location

Step 8 — Map your products

1. From the connected Shopify card, click **Manage Products**.
2. For each Shopify product, choose the matching **7D (IMS) product** and save the mapping.
3. Map every product you expect on Shopify orders so line items import correctly.

Map Shopify products to 7D products

When all products show as mapped, setup is complete.

Need help?

Contact your **7 Degrees Co** account team if the invitation email does not arrive, the Shopify app install fails, or your store does not show as **Connected**.
